

September 1st, 2026

Board of Josephine County Commissioners
500 NW Sixth Street
Grants Pass, OR 97526

Dear: Board

American Medical Response Northwest Inc is requesting a 10% increase to our rates and mileage adjustment listed below. Pursuant to Section 13, of the ambulance contract, please accept this letter as our notification for rate adjustment with an implementation date of October 1st, 2026. AMR believes the rate increase is necessary to offset inflation, increase labor costs and continue to deliver the high quality of service Josephine County expects. There will be no retroactive billing to prior delivered services already billed.

911 Base rate current rate	\$1668.63	Adjustment to	\$1,835.49
ALS non-emergent current rate	\$1668.63	Adjustment to	\$1,835.49
BLS non-emergent current rate	\$1,171.74	Adjustment to	\$1,288.91
Response Fee	\$384.51	Adjustment to	\$422.96
Mileage current rate	\$32.00 per mile	Adjustment to	35.20 per mile

Sincerely,

AMERICAN MEDICAL RESPONSE NORWEST, INC.

Dave Mathews, Operations Manager

AMR System Improvement Report

Updated: June 1, 2026

Prepared for Board Review

Executive Summary

This document outlines organizational improvements across staffing, clinical programs, equipment modernization, and community integration, demonstrating a high-performing EMS system aligned with national standards and regional needs.

Staffing and Workforce Development

AMR maintains 42 full-time and 45 part-time personnel including RNs, paramedics, and EMTs. A 24-hour supervisor model is in place with a structured training pipeline for future leaders. A Field Training Officer (FTO) program ensures clinical consistency. Medical oversight is provided by Physician Supervisor Adam Wurstle. Recruitment and workforce development are supported through student programs and paramedic scholarships.

Operational Capacity

The system operates seven staffed ambulances at peak capacity with four reserve units and one four-wheel-drive unit for wildland response. Specialty resources include a Mass Casualty Incident trailer and a Rapid Emergency Medical (REM) UTV and trailer for off-road response.

Clinical Excellence Programs

AMR maintains CAAS accreditation, the gold standard in ambulance services. Clinical programs include Critical Care Transport (CCT) teams staffed by RNs and specialty paramedics, Stroke coordination with Asante, STEMI response programs including regional equipment support, and sepsis protocol integration. Participation in the CARES registry demonstrates cardiac arrest survival rates 40% above the national average.

Technology and Innovation

Electronic Patient Care Reporting (ePCR) is integrated with Josephine County 911 CAD systems. Advanced cardiac monitoring (LP-15), medication infusion pumps, and video-assisted airway systems support improved patient outcomes and clinical accuracy.

Equipment Modernization

Fleet includes ten Type-3 ambulances and one Type-1 4x4 unit. Specialized assets include a bariatric transport unit, Zoll ventilators, hydraulic Power Pro gurneys, updated ABDs, traction stair chairs, and Lucas-3 mechanical CPR systems deployed across all frontline units.

Safety and Risk Reduction

Enhanced PPE includes extrication gear, infection control equipment, and non-standard safety tools to protect staff during complex incidents. Equipment upgrades focus on reducing provider injury and improving operational safety.

Community Integration and Partnerships

AMR is actively engaged with Emergency Medical Service Board, OHA-EMS planning, regional trauma advisory boards, and multiple local committees. The organization participates in the Fire Chiefs Association, Ambulance Association, and local chambers of commerce.

Community Programs and Public Health

Programs include Stop the Bleed, Narcan distribution through Save Oregon Lives, CPR/AHA training, PARAMED membership programs, and AirMedCare partnerships. Educational outreach includes high school CERT support and college clinical programs.

Disaster Preparedness and Regional Support

AMR participates in FEMA disaster deployments, DHS Chempac response, and county-level surge planning. The organization serves a key role in regional emergency preparedness and coordinated response systems.

AMR system improvement

Staffing:

Employees 42 full time and 45 part time RNs, paramedics and EMTs

Twenty-four hours supervisors with a training program for future supervisors

Field Training Officers program

Physician supervisor Adam Wurstle

Total of Seven staffed ambulances at peak staffing four spares one four-wheel drive for wildland response

Mass casualty Incident trailer

Wildland Fire Response for Medical support "REM" UTV and trailer.

Air Operations through REACH with agreements with Mercy Flights of Medford

Student programs, scholarships for Paramedic training.

Programs:

AMR National CPR day

CAAS accreditation, is the gold standard for Ambulance services

Stop the Bleed program and Kits to each unit

Critical Care Transport Team staffed with RN's and specialty trained Paramedics

CARES Registry with cardiac arrest saves 40% higher than the national average.

Stroke Program, coordinate with Asante who an accredited stroke center

STEMI Program, AMR provides training and equipment "Life Pack-15" to area Fire Departments "First In Oregon"

Sepsis, protocol development and training to local services

County Q.I. Program, bringing all departments to the table for better patient care

Electronic Patient Care Reporting Interface with JOCO 911 CAD

Equipment update:

We have Ten type-Three (3) ambulance and one type-one (1) 4X4 ambulance.

Bariatric unit with specialized equipment the first in Southern Oregon

Cardiac care devices to able to read 12 lead EKGs "Physio control LP-15"

Medication Pumps for medication administration first to have them on 911 ambulances

Fiber optic laryngoscope and Video Scope systems for advanced airway care on ambulances with the latest airway adjuncts

Zoll EMV plus Ventilator systems for CCT RN a better product and the industry standard

Gurneys have been updated this year to new Power Pro hydraulic systems to reduce injury and fatigue

Updated AEDs program to include six additional units placed in the community

Stair Chairs updated to track model

Safety equipment for extrication Gloves, Helmets, and Turnout coat for both Paramedic and EMTS

Infection control PPE and safety equipment not normally part of ambulance daily operations

Lucas-3 CPR compressors on all first out ambulances.

Additional Community participation:

Board of County Commissioners surge mitigation plan and board order

Assisted in new Ambulance Service Plan accepted by OHA-EMS

Oregon State Area Trauma Advisory Board Region Five (5) voting member

Josephine County Medical Task Force

Rogue Community College Advisory Committee-member

911 Technical advisory committee

Grants Pass and IV Chamber of commerce

DHS Chempac "FEDERAL" program AMR will be the service to deploy the medications in an event

Rogue Community College Clinical and work experience program

Rogue Valley Fire Chiefs, member

Oregon State Ambulance Association Voting Member

Pre-hospital care committee in Josephine County

American Heart Association Training Site, CPR-ACLS-PALS

PARAMED Membership Program \$55 dollars per house hold per

Air Med Care membership offered to Josephine County Residence available online or from our local office

Emergency Medical Services Board- Past Chairman and voting member

Disaster Response Team-with national deployment and FEMA contracts

Save Oregon Lives Program. Leave Narcan behind

Local High Schools, Student Cert Program assistance
