

BUDGET COMMITTEE MEETING – Thursday May 28, 2026

9:00 a.m. – Anne Basker Auditorium

600 N.W. Sixth Street, Grants Pass, OR 97526

Budget Committee: Ron Smith, Colene Martin, and Gary Richardson, Marc Kirby, Chris Collins and Dorothy Yetter (excused); Nikole Guzman, Recorder

Budget Officer: Arthur O'Hare

1) Open Meeting – Gary Richardson, Budget Committee Chair

Commissioner Richardson opened the meeting at 9:01 a.m.

2) Declaration of Potential Conflicts of Interest

Budget Committee members reviewed the agenda and declared no potential conflicts of interest related to matters on the agenda.

3) Department Presentations:

a. Public Works and Fleet – Richard Pike and Shannon Doak Exhibit 1 PowerPoint Presentation

Richard Pike and Shannon Doak, Public Works Managers, presented the proposed Public Works and Fleet budgets. Staff reviewed the various funds administered through Public Works, including the Public Works Fund, County Fleet Fund, Road and Bridge Fund, Solid Waste operations, North Valley Industrial Park, and equipment reserve funds. Discussion focused on the department's responsibility for maintaining approximately 570 miles of county roads, numerous bridges and structures, culverts, gravel sources, and fleet facilities without reliance on General Fund property tax revenues.

Staff reviewed major revenue sources, including state fuel taxes, federal forest revenues, transportation block grant funding, permits, and interfund reimbursements. Discussions occurred regarding operational costs, staffing levels, fleet replacement planning, chip seal programs, storm response activities, bridge maintenance, and ongoing infrastructure projects. Public Works reported plans to complete approximately 33 miles of chip seal work during the upcoming construction season and reviewed several bridge replacement and road improvement projects currently underway or in design.

Committee members discussed fleet replacement schedules, reserve funding, vehicle replacement costs, county vehicle usage, bridge conditions, deferred infrastructure needs, funding limitations, and the impacts of transportation funding uncertainty on future maintenance projects. Staff explained the methodology used to establish vehicle replacement rates, maintain fleet sustainability, and prioritize road and bridge improvements throughout the county. **Exhibit 1 PowerPoint Presentation**

b. Finance- Arthur O'Hare Presentation

Arthur O'Hare, Budget Officer, presented the proposed Finance Department budget and reviewed staffing levels, operational responsibilities, and budget changes from prior fiscal years. O'Hare explained that the department currently operates with six budgeted positions and is responsible for countywide financial reporting, budget preparation, accounting oversight, and financial management functions.

Discussion occurred regarding professional service expenditures, software maintenance costs, and audit services. O'Hare reported that the County's fiscal year ending June 30, 2024 audit had been completed; however, work associated with subsequent audits remained unfinished. Committee members discussed the status of outstanding audit work, financial reporting requirements, and anticipated efforts to complete audit activities and establish a timeline for future audit completion. Additional discussion occurred regarding financial reporting tools, departmental support provided throughout the County, and opportunities to improve access to financial information for decision-makers and the public

c. Human Resources – Michelle Shaw-Exhibit 2 PowerPoint Presentation

Michelle Shaw, Human Resources Director, presented the proposed Human Resources budget and reviewed departmental responsibilities, including recruitment, onboarding, employee benefits administration, labor relations, policy compliance, workers' compensation management, and employee support services. Shaw

reported that the department currently supports approximately 400 County employees and anticipates processing approximately 1,850 employment applications during the upcoming fiscal year. Discussion occurred regarding staffing levels, workers' compensation claims, labor negotiations, employee recruitment efforts, and legal expenditures associated with employment matters. Shaw explained that one of the department's goals is reducing employment-related legal costs through proactive employee relations, policy compliance, and training initiatives. The Committee also discussed countywide employee counts, staffing trends, and plans to expand employee training opportunities, including CPR, first aid, and AED instruction. **Exhibit 2 PowerPoint Presentation**

d. Information Technology – Ken Clever Exhibit 3 PowerPoint Presentation

Ken Clever, Information Technology, presented the proposed budgets for Information Technology, Geographic Information Systems (GIS), and Cybersecurity. Clever reviewed departmental responsibilities, including support of countywide computer systems, software applications, servers, networking infrastructure, cybersecurity operations, GIS mapping services, telephone systems, and technology support for County departments. Clever reported that the department currently supports approximately 570 users and more than 600 managed devices throughout the organization.

The presentation included discussion regarding website improvements, accessibility enhancements, evaluation of emerging artificial intelligence tools, cybersecurity initiatives, GIS services, and long-term technology planning. Clever reviewed performance metrics related to system uptime, network availability, multi-factor authentication coverage, phishing prevention efforts, ticket response times, and cybersecurity readiness. Committee members discussed technology training, cybersecurity investments, staffing needs, county communications systems, and opportunities to improve technology services provided to County departments and the public.

Clever requested funding to restore a previously authorized Help Desk Support Technician position. Staff explained that filling the position would improve customer support, reduce ticket backlogs, increase patch compliance, and allow senior technology staff to focus on infrastructure, security, and long-term planning responsibilities. **Ken Clever Exhibit 3 PowerPoint Presentation**

e. Legal Counsel – Wally Hicks Exhibit 4 PowerPoint Presentation

Wally Hicks, Legal Counsel, presented the proposed Legal Counsel budget and reviewed services provided to the Board of Commissioners, County departments, elected officials, and advisory bodies. Discussion occurred regarding legal representation, contract review, labor and employment matters, litigation management, public records issues, risk management, and legal support provided throughout County operations. Committee members discussed outside legal services, litigation costs, and ongoing efforts to provide timely and effective legal guidance while managing expenditures responsibly. **Exhibit 4 PowerPoint Presentation**

f. Forestry – Dave Streeter Exhibit 5 PowerPoint Presentation

Dave Streeter, Forestry, proposed Forestry budget and reviewed management of County forestlands, timber resources, forest health initiatives, and stewardship activities. Discussion included timber harvest planning, forest management objectives, reserve funding, revenue generation, wildfire mitigation efforts, and long-term sustainability of County Forest resources. Committee members discussed market conditions, forest health concerns, regulatory requirements, and strategies intended to balance responsible resource management with future revenue opportunities. **Exhibit 5 PowerPoint Presentation**

4) Budget Officer answers questions/provides requested information

Budget Officer Arthur O'Hare responded to questions raised throughout the departmental presentations and provided clarification regarding budget assumptions, staffing allocations, internal service fund charges, reserve accounts, operational expenditures, audit costs, and long-term financial planning considerations. Discussion occurred regarding funding methodologies, departmental cost allocations, vehicle replacement reserves, technology investments, and projected future obligations.

5) Public Comment (*limit of three minutes each*)

No public testimony was provided.

6) Confirm next scheduled meeting.

Chair Richardson confirmed that the Budget Committee would reconvene for continued review of the Fiscal Year 2026–2027 Budget and consideration of additional budget matters.

The meeting adjourned at 12:16 p.m.

Public Works

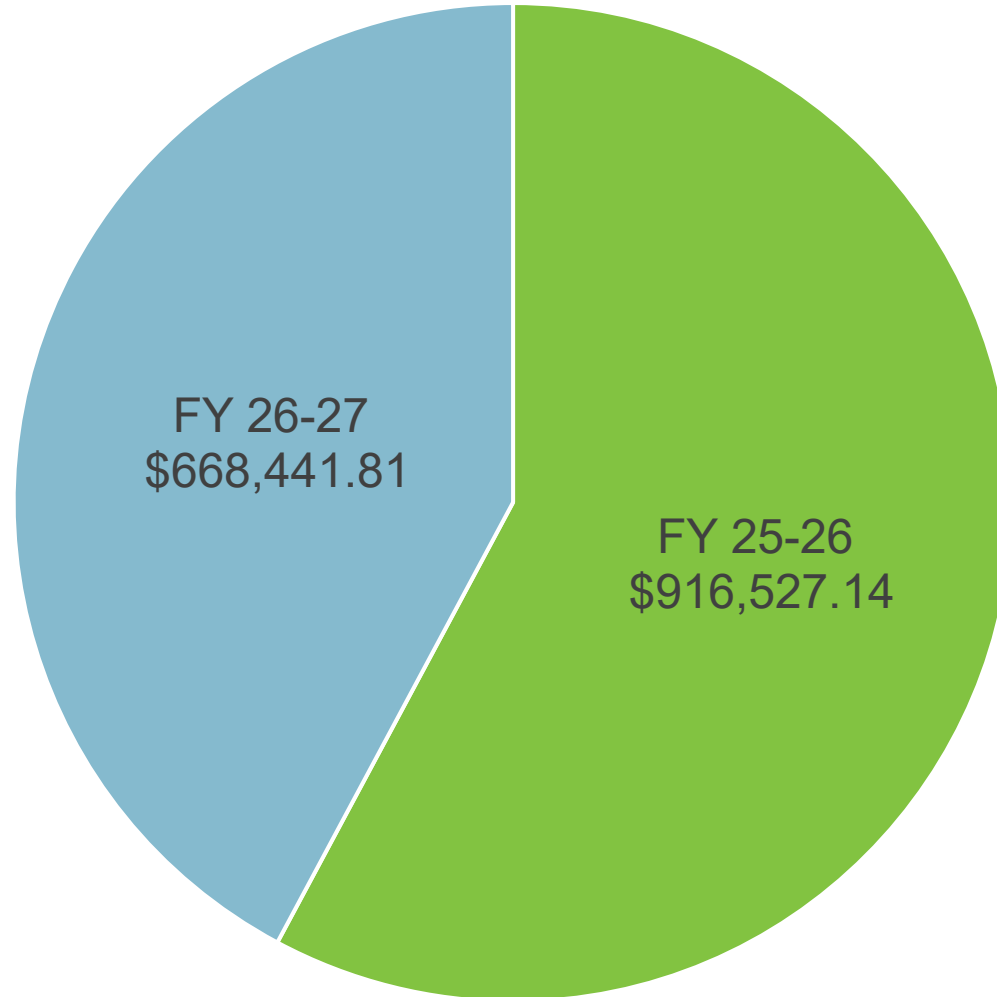

Purpose of Program

Public Works strives to make living and traveling in Josephine County safe and convenient. The revenue received from state motor vehicle fuel tax and a portion of the timber receipts from U.S. Forest Service lands are designated by law to be used by the county for road purposes. The Department does not receive any county property taxes to fund its operations. Designated work efforts on major maintenance programs include chip sealing, asphalt patching and overlays, ditch cleaning and culvert replacement, storm response, and vegetation management.

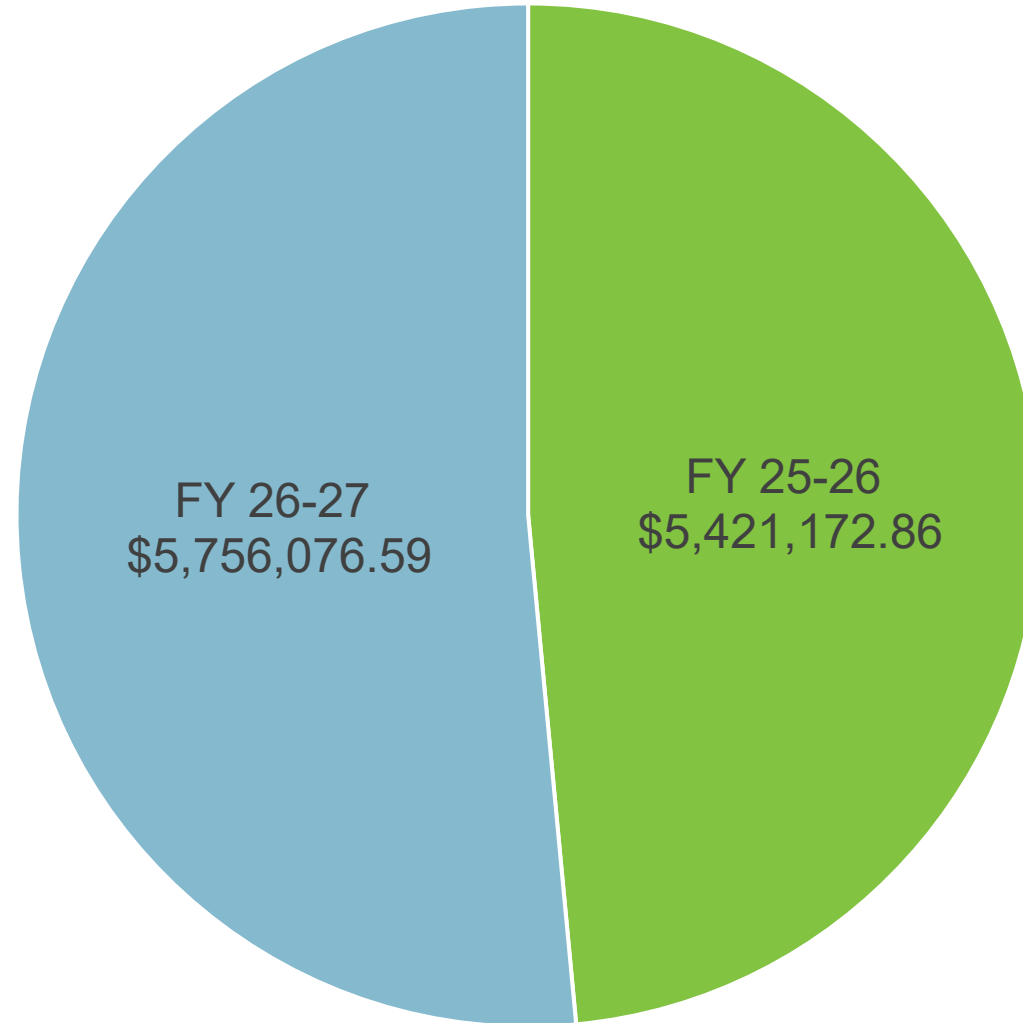

Public Works is responsible for managing and maintaining:

- 570 miles of county-maintained roads
- 170 bridges and structures
- 13,000 road and driveway culverts
- 19 gravel resource and stockpile sites
- Fleet Maintenance Facilities

2026 – 2027 BUDGET

Human Resources

Human Resources

- Josephine County Employees
 - Human Resources is funded by the Internal Services Fund.
- 3.0 FTE
 - 3.0 FTE in the office support 400 employees including Managers, Directors, Administrators and Elected Officials.

Core Daily Operations

- **Recruitment and Onboarding**

- We recruit, hire, and welcome the talent needed to fill positions within the county. In 2025, we held 20 new hire orientations. We processed 1728 applications for job openings.

- **Labor Relations**

- This office is responsible for all union negotiations with the four bargaining units: AFSCME, LIUNA, FOPPO, and Sheriff Association. Human Resources also ensures employee and County compliance with Federal and State Labor Laws as well as County policy.

- **Benefit Administration**

Process and administer benefits for all four bargaining units as well and the non-union group while maintaining quality at the best available value.

Information Technology

Budget Presentation • Fiscal Year 2026-27

IT • GIS • Cybersecurity

Presented to the Budget Committee

Department Overview

Three programs supporting every County function

Information Technology

Provides infrastructure, application, and desktop support for every County department. Coordinates technology resources to support each department's mission efficiently and cost-effectively.

Geographical Information System

Creates, maintains, and distributes electronic geographic data for the County. Supports decision-making by County departments, partner agencies, and the public, and is critical to emergency response.

Cybersecurity Program

Protects County data, services, and public trust. Separated as its own program in FY 25-26 to reflect its importance in safeguarding sensitive information and ensuring continuity of operations.

Information Technology

Budget Goals & FY 26-27 Initiatives

1

Improve Efficiency, Transparency, and Public Engagement

Enhanced Service: County website reorganization and progress toward ADA / WCAG accessibility compliance.

Efficiency: Explore and pilot the safe use of AI within the organization, with County-wide guidance for acceptable use.

2

Ensure Long-Term Financial Sustainability of Core Services

Maintain Internal Service Fund methodology. Develop a rolling multi-year financial plan covering recurring costs, refresh cycles, licensing, and capital needs — reviewed annually with the Budget Officer.

3

Strategic Investment in Public Safety and Community Infrastructure

IT is core infrastructure for the Sheriff's Office, Jail, District Attorney, and emergency communications. Lifecycle management of network and security infrastructure, modernization of communications systems, and reliable field access for public safety personnel.

Geographical Information System (GIS)

Budget Goals & FY 26-27 Initiatives

1

Improve Efficiency, Transparency, and Public Engagement

Enhanced Service: Maintain existing public-facing mapping applications and implement additional applications as needed.

Efficiency: Expand self-service data access for County departments, reducing custom map requests that require analyst time.

2

Ensure Long-Term Financial Sustainability of Core Services

Funded through ISF charges and dedicated Clerk recording fee revenue — a stable funding stream tied to ongoing County operations. Multi-year plan separates baseline costs from project-driven expansions.

3

Strategic Investment in Public Safety and Community Infrastructure

Direct contributor to public safety: patrol operations, wildfire response, search and rescue, evacuation planning, and emergency dispatch accuracy. Continued partnership with Sheriff's Office, Emergency Management, and rural fire protection districts.

Cybersecurity Program

Budget Goals & FY 26-27 Initiatives

1

Improve Efficiency, Transparency, and Public Engagement

Enhanced Service: Expand end-user security awareness and resilience — measured by training completion, phishing simulation outcomes, and reported suspicious activity.

Efficiency: Evaluate and consolidate security tooling where appropriate to reduce cost and administrative overhead without reducing coverage.

2

Ensure Long-Term Financial Sustainability of Core Services

Recurring operational cost protecting every County service. Funded through ISF so security posture remains stable and does not depend on one-time or temporary revenue.

3

Strategic Investment in Public Safety and Community Infrastructure

Foundational to public safety continuity. A successful attack can take jail booking offline, disrupt dispatch, interrupt prosecution, and sever field access. Roadmap aligns with CISA guidance and cybersecurity insurance requirements.

Measurement Approach

Restructuring KPIs to align with Board direction on measurable outcomes

IT and Cybersecurity will report against three categories of measurement, with a complete KPI table aligned with these categories — including baselines and targets — published in the FY 27-28 budget narrative.

Service Performance

Quality and timeliness of technology services delivered to County departments — system and network availability, helpdesk response and resolution times, project completion against plan.

Security Posture

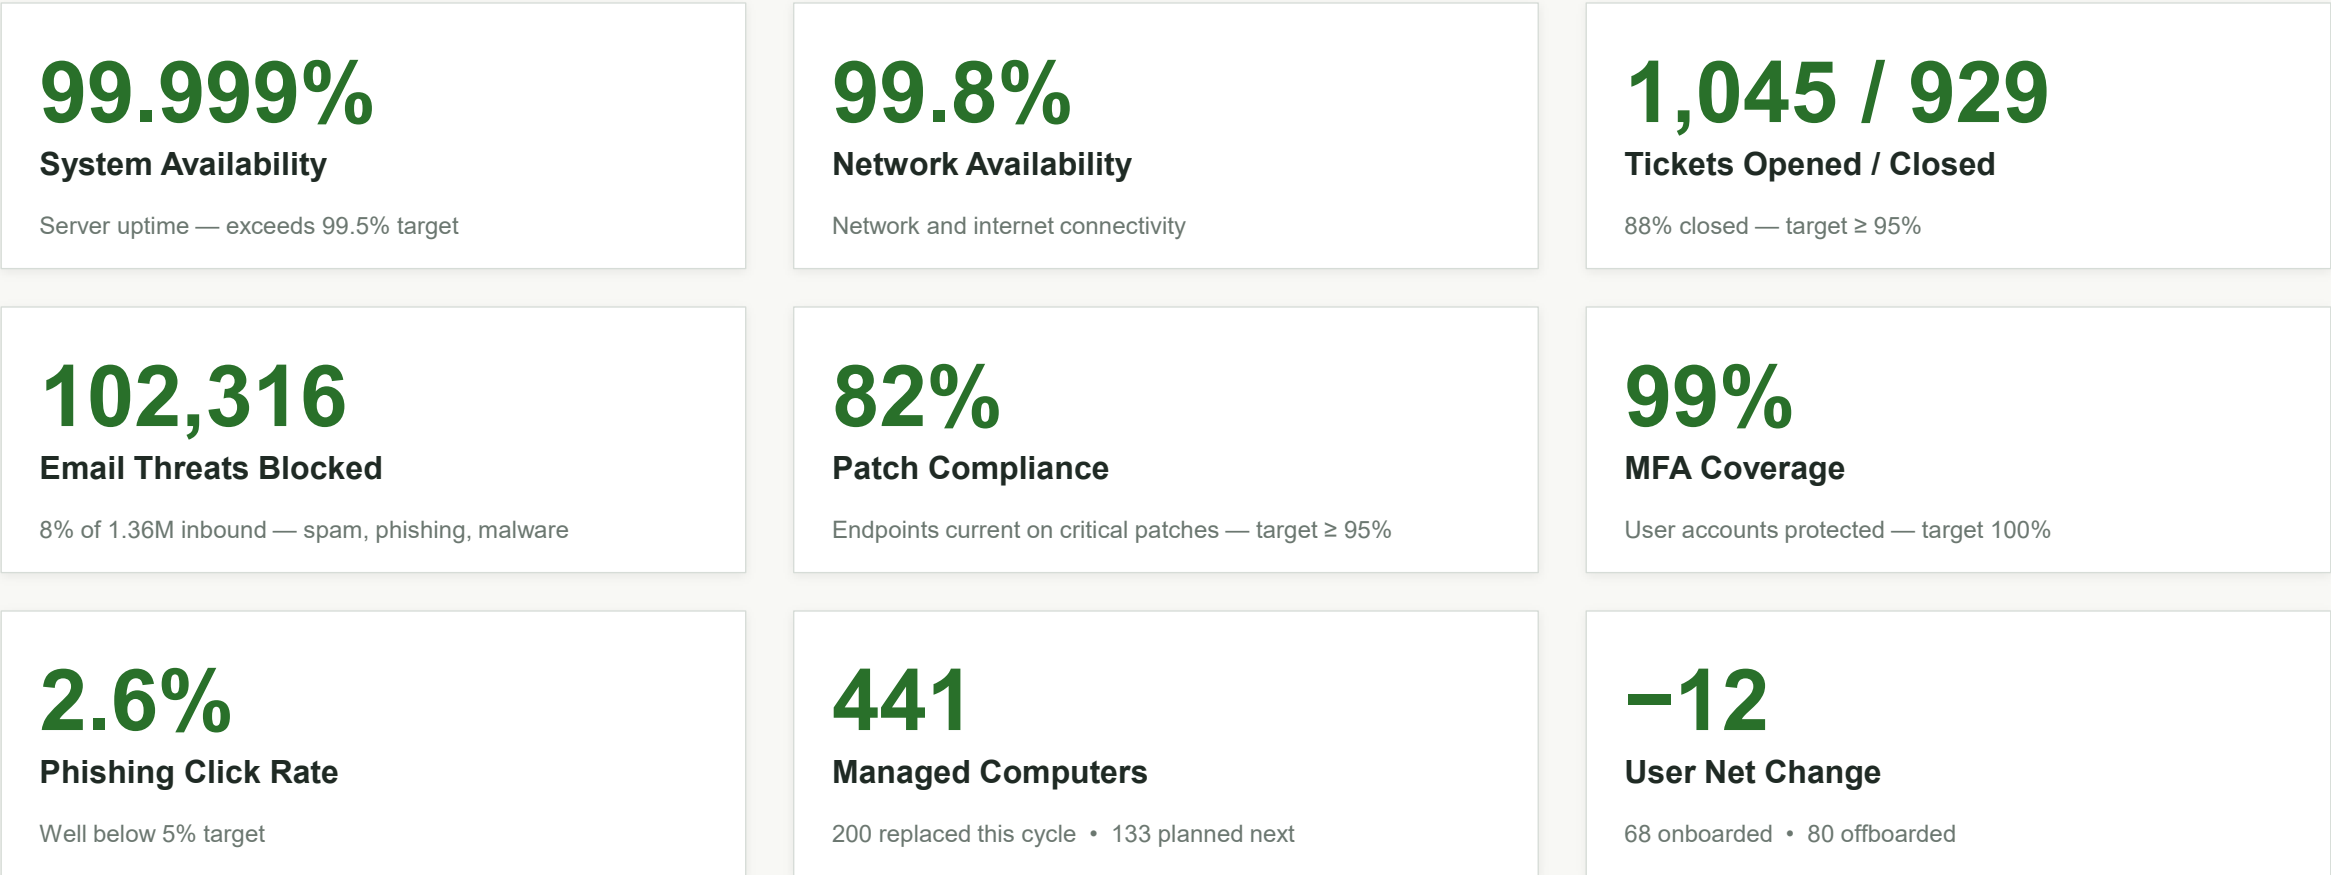

Protection against cyber threats — email threats blocked, confirmed security incidents and response times, patch compliance, MFA coverage, and workforce resilience measures.

Workload and Scale

Size of the environment IT supports — active users, managed devices, helpdesk ticket volume, and email volume processed.

FY 25-26 Snapshot

Selected indicators across all three measurement categories

Five-Year Vision

Where the three programs are headed and how we get there

Information Technology

- Modernize core systems on a planned lifecycle, not reactive replacement
- Increase resiliency and tested recovery capability
- Flexible work environment within a secure network
- Standardize the mobile stack for field staff across departments

GIS

- A geographic application from almost every County department, delivering useful data to taxpayers
- A tested toolbox of GIS responses to wildfire, flood, severe weather, and search and rescue

Cybersecurity

- Defensible posture aligned to CISA, CJIS, HIPAA, and insurance requirements
- Layered defenses that assume attacks will occur
- Tested incident response and recovery capability
- Workforce resilience as a measurable layer of defense

Sharpening Our Chain

Why maintaining our tools and skills is part of the work

Two loggers competed for the same job — cut the most wood in a day. One worked nonstop. The other paused every hour. At day's end, the one who paused had cut far more.

“I wasn't resting — I was sharpening my saw.”

For IT, sharpening the saw is the work that doesn't close tickets but makes all the cutting possible:

- Backup and recovery procedures
- Debugging and troubleshooting skills
- Software, compiler, and tooling currency
- License management and renewals
- Training and documentation

A team cutting nonstop never gets to sharpen — and over time, the blade dulls.

Staffing Request

Help Desk / Support Technician — One FTE

The Gap: Ticket volume is outpacing the team's capacity to close it.

This is not a new position — it was filled until roughly one year ago. The current backlog reflects the team operating short-staffed since the vacancy.

1,045

Tickets opened (FY 25-26)

929

Tickets closed (FY 25-26)

116

Net backlog this year

FY 25-26 establishes our baseline for this metric — reported going forward under our Measurement Approach.

What the position does:

- Absorbs routine, high-volume help desk work
- Frees senior staff to do the maintenance, security, and project work that prevents bigger problems — sharpening the saw
- Improves first-response and resolution times, a measurable Goal 1 outcome

THE ASK

1 FTE — Help Desk / Support Technician

Previously filled · vacant ~1 yr

Total cost: **\$124,600**

Questions & Discussion

Budget Trends

2026 – 2027 BUDGET

FORESTRY

Forestry Department

- Manage Approximately 30,000 Acres of Timberland
 - Ordinance 2018-001
 - “Provide the Maximum return to the citizens....”
 - “....Maximum amount of revenue through the sale of forest products and the grounds maximum amount of growth capability”
 - 4.02 “Forestlands shall be cultivated and managed to vigorously produce in perpetuity the greatest volume of softwood industrial timber....”
- 6.5 MMbf of sustained yield softwood harvest target
 - Based on a 10 year average
 - Volume set by BCC in 2016
- Stumpage sales and Logging Contracts sold through competitive sealed bid process
 - Purchasers to harvest volume within 3.5 years
 - Periodic payments through life of contract
- Other forest products
 - Firewood – public and commercial
 - Post and Poles
 - Other: mushrooms, rocks, manzanita, etc.

Revenues

- Timber Sales,
 - 2026 - 3 offered, 3 sold, 6,500 mbf - \$2,500,000 of revenue
- Cell towers
 - \$71,000 projected - revenue must go to Forestry Property Reserve (47) Fund
- Firewood and other forest products
 - \$200 projected

Budget Goal 1 - Improve Efficiency, Transparency, and Public Engagement

Enhanced Service Initiative: Improve citizen access, engagement, or service quality (e.g., digital tools, public dashboards, response-time standards, expanded outreach, or staff development);

Forestry is accessible via phone, in person visit or via Josephine County website. Questions and concerns are always answered in a timely manner when received. Additionally, all information on timber sales and firewood opportunities are advertised in the local newspaper and posted online at the Josephine County website along with information regarding mining.

Efficiency Initiative: Reduce costs or improve operational efficiency while maintaining or enhancing service levels (e.g., process improvements, automation, benchmarking, or alternative service delivery models).

Forestry is working to enhance efficiency through measures to ensure seedling survival during initial planting. Forestry is continually looking at improved seedling stock, planting timing, planting quality to ensure success during initial planting which decreases costs of replanting due to seedling mortality. Forestry continues to improve our access to technology that assists in improving efficiency from data collection and the use of drone technology. Additionally, continued education and stakeholder interviews are used to produce sales that are in high demand by purchasers and produce the maximum return of stumpage for the County by offering highly sought after sales.

Budget Goal 2 -Ensure Long-Term Financial Sustainability of Core Services

Develop and maintain a multi-year financial plan to support all mandated and essential County programs, with a focus on balancing infrastructure needs and public safety services.

- Require annual departmental reviews with clearly defined costed action plans.
 - Forestry will report annually on progress of cost savings plans in silviculture, and actual to budgeted costs.
- Prioritize sustainable funding strategies that reduce reliance on one-time or temporary revenue sources; and
 - Forestry is a self-supporting department that does not rely on any outside funding. Additionally, there is a Forestry Reserve Fund that supports the program during years of poor log markets so that the program doesn't draw resources from the general fund.
- Align expenditures with long-term fiscal capacity and community priorities.
 - A majority of Forestry's expenditures are through contract supplies and services. Products and services are procured through the formal and informal bid process with the best return to the County (cost and quality) in all considerations.

Budget Goal 3 -Strategic Investment in Public Safety and Community Infrastructure

Ensure responsible and sustainable allocation of financial resources to support public safety, infrastructure, and community priorities through thoughtful planning and long-term fiscal strategies. Maintain balanced and coordinated funding for core public safety services, including the Sheriff, Jail, and District Attorney.

Revenues generated by Forestry help support Juvenile Justice and Veterans Services, as dictated by the BCC.

Prioritize funding strategies that support recruitment and retention of critical public safety personnel.

Forestry is self-supporting with no draw of resources from other general fund departments.

Plan for capital improvements and infrastructure upgrades, including communications systems and essential public facilities.

Forestry has no plans for capital improvements in the near future.

Evaluate and pursue fiscally responsible funding options for major capital projects, including potential bond financing where appropriate.

Forestry does not anticipate any major capital projects in the near future. If any are determined at a later date, proposals would include payment by revenues earned.

Identify and address infrastructure needs that impact public health and safety through long-term financial planning.

Addressed above in the third bullet point.

Support community-enhancing programs and events through appropriate and sustainable funding mechanisms.

Forestry has conducted our annual Ross Roe Memorial Youth Tree Plant for 36 years, we will continue this educational experience for youth with funds derived from revenues earned, additionally we will look for grant funding to offset expenses.

2026-2027 Budget

Account Number	Description	Budget Yr Proposed	Budget Yr Adopted	Budget Yr Adopted
		2026 - 2027	2025 - 2026	2024 - 2025
FOR/Forestry	Revenue	0	0	0
FOR/Forestry-Timber	Revenue	2,085,400	1,742,000	801,000
FOR/Forestry-Re-Fore	Revenue	0	99,000	0
FOR/Forestry-Youth T	Revenue	0	0	50,000
FOR/Forestry	Interfund Transfers In	0	53,600	712,100
	Total Resources	2,085,400	1,894,600	1,563,100
FOR/Forestry	Interfund Transfers	47,600	(50,500)	(40,000)
FOR/Forestry-Timber	Interfund Transfers	49,300	(47,200)	0
FOR/Forestry-Re-Fore	Interfund Transfers	60,800	(74,500)	0
FOR/Forestry-Youth T	Interfund Transfers	300	(100)	0
FOR/Forestry	Expenditure	500,700	(504,600)	(476,200)
FOR/Forestry-Timber	Expenditure	518,700	(471,800)	(467,400)
FOR/Forestry-Re-Fore	Expenditure	639,750	(745,300)	(390,500)
FOR/Forestry-Youth T	Expenditure	2,900	(600)	(50,500)
	Total Requirements	1,820,050	(1,894,600)	(1,424,600)
	Net Resources/Requirements	265,350	0	138,500

Five-Year Vision:

- Improve forest inventory accuracy and verification with contractor
 - Measure inventory volumes against actual cutouts, work with contractor to adjust growth model as necessary
- Liquidate non-productive properties
 - Work with Property Management to get non-productive tracts into land sale auctions
- Re-investment into productive forest tracts
 - Watch market for land purchase opportunities
- Increase/maximize productivity of forest
 - Obtained through silviculture program to maximize growth of target species and reduction of competitive species
- Maximize public firewood opportunities for the public
 - Continue to maximize the opportunities from our harvest areas for public firewood removal and advertise opportunities on County website
- Improve seedling survival
 - Continuing to look at alternative seedling stock, measure success and failures, look at a heavier transition to fall planting to allow advanced root growth prior to dry season, measure, report and act. Overall goal will lead to improved efficiency and reduced costs from interplanting
